Strategies for Improving Business Performance

July/ August 2017

Welcome

Technology is a hot topic. Are you thinking about the internet of things and how it might affect your supply chain strategy? Or, how about artificial intelligence? Robots? ERP systems? We've dedicated this month's articles to these topics. We aren't advocating implementing technology for technology's sake - quite the opposite actually but we should be aware of what's out there, what's trending and what you can leverage to achieve results.

If you are interested in hearing a panel of executive experts on the latest technologies for manufacturers and distributors, join us at [APICS Inland Empire's](#) executive panel and networking symposium on "Leveraging Technology for Supply Chain Success"

We also have several upcoming events. One of our alliance members, [Lisa Anderson](#) will be speaking at Mobility 21's Conference session, "[Speed to Delivery: Goods Movements High Tech Future](#)". Join us to learn more.

And, of course, check out our many training courses in your local APICS chapter.

The Internet of Things is
Trending in Supply Chain

By [Lisa Anderson, MBA, CSCP](#)
